Project 2620, Ribeirinho REDD+ Project: CCB validation and verification approval request denied

Dear Diego Periera,

Verra denies the CCB validation and verification approval request for project 2620 (monitoring period: 1 July 2018 – 30 June 2021) for the reasons summarized below. Note that the project has not been rejected.

- The project requested the CCB validation and verification approval request on 26 June 2023 using the joint templates; *CCB & VCS Project Description Template*, *CCB v3.0*, *VCS v3.4* and *CCB & VCS Monitoring Report*, *CCB v3.0*, *VCS v3.4*.
- Project 2620 had undergone the CCB validation and verification public comment period from 27 October 2021 to 26 November 2021, which was 19 months before the CCB validation and verification request was made to Verra on 26 June 2023. This is in non-compliance with Section 4.2.4 of the *CCB Program Rules v3.1*, which states that “Verra shall receive the validation and/or verification report and validation and/or verification statement within one year of the initiation of the relevant public comment period.”
- Section 3.3.5 of the *CCB Program Rules V3.1* states that if a project is not successfully validated or verified according to a recognized GHG program (VCS, in this case) at the time of its validation or verification to the CCB rules, it shall use the *CCB Project Description Template* and the *CCB Monitoring Report Template* to demonstrate compliance with the *Climate, Community & Biodiversity Standards* Climate Section. Therefore, as no parallel request for VCS registration and verification approval was received, this request is in non-compliance with Section 3.3.5 of the *CCB Program Rules v3.1*, for using incorrect templates.

Next steps

- The account holder may submit a new CCB validation and verification public comment period request immediately as per Section 4.2.5 of the *CCB Program Rules v3.1*, by following the steps below:
 - 1) Upload the most recent versions of relevant project documents to the Verra Registry,
 - 2) Submit a new CCB Validation and verification public comment period request via email to registry@terra.org.
- Upon completion of the validation and verification public comment period, “the VVB shall address any and all comments from the public comment period as defined in Sections 4.6.4 and 4.6.7 and abide by the rules set out in Section 4.6.6 with respect to

www.terra.org

comments” as per the program rules set out in Section 4.3.12 of the *CCB Program Rules v3.1*.

- Next, the account holder may submit a new CCB validation and verification approval request no sooner than after the public comment period has ended but before one year from the date of the closing of the public comment period, by following the steps below:
 - 1) Upload the appropriate project documents to the Verra Registry in accordance with the request being made. If the project requests only a CCB validation and verification approval request, the *CCB Project Description v3.0* and the *CCB Monitoring Report v3.0 templates* shall be used.
If the project requests VCS registration and verification approval as well, the *CCB & VCS Project Description Template, CCB v3.0, VCS v3.3, and CCB & VCS Monitoring Report, CCB v3.0, VCS v3.4* joint templates shall be used.
 - 2) Submit a new CCB validation and verification approval request via email to registry@terra.org.

This letter will be made public on the Verra Registry.

Sincerely,

Sinclair Vincent
Director, Sustainable Development Innovation
